

## Chelated Mix Micronutrients Fertilizer - Grade-2

व्हर्टेक्स

*Vertex*

**Vertex** is a combination of micronutrients specified by Maharashtra State Government as Grade II. Micronutrient availability is dependent on soil and environmental factors. Vertex provides 6 vital micronutrients like ferrous (as Fe), manganese (as Mn), zinc (as Zn), copper (as Cu), boron (as B), and molybdenum (as Mo). Vertex application at different stages of crop development makes crop healthy and robust. It minimizes flower drop and maximizes yield.

---

**Doses :**

**Foliar Application :** 1 gm to 1.25 gm per liter of water.

**Drip Fertigation :** 1 kg per acre.

युनिटी

UNITY

Unity is a combination of micronutrients specified by Maharashtra State Government as Grade II. Micronutrient availability is dependent on soil and environmental factors. Unity provides 6 vital micronutrients like ferrous (as Fe), manganese (as Mn), zinc (as Zn), copper (as Cu), boron (as B), and molybdenum (as Mo). Unity application at different stages of crop development makes crop healthy and robust. It minimizes flower drop and maximize yield.

**Doses :**

Foliar Application : 2.5ml/litre.

Drip fertigation:- 3 ltr per acre.

## मिल्स MEALS

Meals is a combination of micronutrients specified by Maharashtra State Governments Grade 1. Micro provides essential plant nutrients such as Zinc, Iron, Manganese, Copper, Boron, and Molybdenum in ideal predetermined proportions. It prevents and corrects traced elements.

### Doses :

Soil Application : 10 kg per acre.

## बोरो टेक

## BORO-TECH

(Boron 20%) Di-sodium Octa Borate Tetra Hydrate ( $\text{Na}_2\text{B}_8\text{O}_{13}\cdot 4\text{H}_2\text{O}$ )

- Boro-Tech Boron is Imported best quality micronutrient.
- Boron is essential for absorption of calcium, regulation of carbohydrate metabolism and transportation of sugars.
- Boron improves seed set under stressful conditions.
- Boron Prevents cracking of stems and fruits.
- Boro-Tech Boron 20% is efficient Boron fertilizer to correct Boron deficiency in soils and Crops to maximize crop yields.

### Doses :

Soil application -1.5 to 2kg per acre.

Foliar application 1 to 1.5gm per lit.

## झिंको टेक ZINCO-TECH

(Chelated Zinc as Zn-EDTA)

- Zinco-Tech Zn EDTA is Imported best quality micronutrient.
- Zinco-Tech Zn EDTA can be used through drip irrigation as well as through foliar applications.
- Zinco-Tech Zn EDTA can be used on wide range of soil pH (5 to 10) for better uptake of Zinc.
- Zinco-Tech Zn EDTA is a chelated by special chelating agents hence uptake of these nutrients is more compared to conventional products.
- Zinco-Tech Zn 12% is efficient Zinc fertilizer to correct Zinc deficiency in soils and Crops to maximize crop yields.

### Doses :

Foliar Application : 1 gm to 1.25 gm per liter of water.

Drip Fertigation : 1 kg per acre.

## फेरो टेक

## FERRO-TECH

(Ferrous EDTA 12%)

- Ferro- Tech EDTA helps to prevent major as well as minor micronutrients deficiencies at any stage of crop.
- Fe EDTA can be used on wide range of soil pH (4.0 – 8.0) to prevent permanent deficiencies.
- Fe EDTA is chelated by special chelating agents and hence uptake of Iron is more compared to conventional sources. Due to chelating agent these elements are slowly available to the plants for a longer period.
- Fe EDTA can be used through drip irrigation as well as through foliar applications to correct deficiencies.

### Doses :

Foliar Application : 0.5 to 1 gm per liter of water.

Soil Application : 500 gm to 1 kg per acre.

**कॉम्प्लेक्स फर्टी**

**COMPLEX FERTI**

**NPK12:11:18+Mg+S+TE**

NPK12:11:18 is complex fertilizer and can be blended with all essential micro nutrients in chelated form. It gives rapid and healthy to crop and recovers deficiencies due to balanced nutrients supply. increases disease and pest resistance, Ultimately reduces cost on pesticides and fungicides. Early and uniform flowering prevents flower and fruits dropping, results in more yield. It also increases fruit quality, weight, colour, size and self life.

**Doses :**

25 Kg. per acre 30 days interval 2 times .

## एन.पी के १९:१९:१९ N:P:K - 19:19:19

The product is free-flowing, fine crystalline multi nutrient fertilizer, which is fully soluble in water. It supplies essential macro nutrients (N.P.K.) together to crops. It contains nitrogen in different forms needed gradually at different growth stages of crops. It is useful specially for healthy vegetative growth of plants. It is an excellent balanced nutrient source for Vegetables, Fruit Tree, Field Crops, Flowers, Turf and Gardening.

### Doses :

Foliar Application : 5 gm per liter of water.  
Drip Fertigation : As per crop stage.

## एन.पी के १२:६१:०० **N:P:K - 12:61:00**

The product is free-flowing, fine crystalline multi nutrient fertilizer, which is fully soluble in water. It contains highest phosphorus (P) content available. It is useful to induce more flower and excellent fruit setting in all type of crops. It is also useful for uniform bumper and healthy flowering.

### Doses :

Foliar Application : 5 gm per liter of water.  
Drip Fertigation : As per crop stage.

## एन.पी.के ००:५२:३४ N:P:K - 00:52:34

The product is free-flowing, fine crystalline multnutrient fertilizer, which is fully soluble in water. It is the most concentrated fertilizer containing both important P&K nutrients. It is useful to induce more flowers and excellent fruit setting for all type of crops.

### Doses :

Foliar Application : 5 gm per liter of water.  
Drip Fertigation : As per crop stage.

## एन.पी.के १३:००:४५ **N:P:K - 13:00:45**

The product is free-flowing, fine crystalline multinutrient fertilizer, which is fully soluble in water. It is useful for excellent fruit setting, fruit development and to increase weight of the fruit in all type of crops. It has low N/K ratio therefore suitable for all crops and all growing stages in crop cycle.

### Doses :

Foliar Application : 5 gm per liter of water.

Drip Fertigation : As per crop stage.

## सी एन +बोरॉन C N + BORON

The product is a dense granular fertilizer which is fully soluble in water. It improves cell wall of plant cell which leads to better quality, shelf life of marketable produce. It helps plant to enhance tolerance against diseases and insect infection due to increased cells strength. It prevents cracking, rotting in fruit/vegetables and other crops. It contains Nitrogen in Nitrate form a preferred source for most of fruits and field crops. It provides available Calcium along with Nitrogen rapidly.

### Doses :

Foliar Application : 5 gm per liter of water.  
Drip Fertigation : As per crop stage.

## पोटॅशियम शोनाइट **POTASSIUM SCHOENITE**

Potassium Schoenite is Potassic Fertilizer which is used as straight fertilizer as well as for Fertigation and Foliar application. Potassium Schoenite is  $K_2SO_4 \cdot MgSO_4 \cdot 6H_2O$ . It is nature's unique & perfectly balanced rich source of Potassium, Magnesium and Sulphur in 100% water soluble form. Potassium Schoenite is unique fertilizer which contains three important nutrients in balanced proportion, hence it plays vital role in rapid and healthy growth for all the crops, resulting in quality produce and high yield.

### Doses :

Foliar Application : 5 gm per liter of water.

Drip Fertigation : As per crop stage.

## एन.पी.के 00:00:50 N:P:K - 00:00:50

The product is free-flowing, fine crystalline multinutrient fertilizer, which is fully soluble in water. It contains potash & sulphur which helps to improve shelf life of fruits. It is useful for development of fruit size, increases weight, sugar, colour formation and maintaining quality of fruit in all type of crops.

### Doses :

Foliar Application : 5 gm per liter of water.  
Drip Fertigation : As per crop stage.

## एन.पी.के 30:१०:१० **N:P:K - 30:10:10**

(100% Water Soluble Fertiliser)

Water Soluble & Stabilized Water Soluble Fertilizers

Crop Tech 30:10:10 SP is a water soluble NPK compound fertilizer with micro nutrients High content. This fertilizer contains all stated plant nutrients for a customized fertilization of agricultural and horticultural crops, Its excellent solubility prevents clogging of sprayer nozzles. For foliar application, As, however, certain types of water may lead to precipitation even without the addition of fertilizer, special care is required where such water are used.

### Doses :

Depends on soil Analysis & crop stages.  
Do not apply fertilizer on Dry Soil condition.

ह्यूमॅक्स

**HUMAX**

(Fulvic Humate 98%) Excellent Solubility in water - 98% Water soluble  
Help to Increase Nutrient uptake by plant roots. Increases White roots and help to develop Healthy crop. It is natural soil conditioner which helps to hold more nutrients in root zone which can be taken up by plant roots. Humic acid is a high active soil conditioner improves the soil structure to increase its water holding capability. Increases the cation Exchange capacity of soil, results in more availability of nutrients applied in soil.

**Doses :**

Through Drip irrigation or soil application : 1kg/acre, repeat use 2-3 times at 25-30 days interval during one crop cycle.  
Foliar application 2.5 gm per lit of water

**ओपनर**

**OPENER**

(Plant Growth Promoter)

Opener Contains A Potent Mixture of Plant Enzymes, Ammo Acid, Root Promoter Element, Humic Acid, Blended with precursors of cytokinins and auxin derived by using specialize fermentation and extraction methods in granular form, these element are necessary for the healthy and vigorous root growth of plants, which in turn increases healthy and venomous plant growth. Opener accelerates seed germination and promotes white root growth in plants improves plant strength to fight environmental stress and improve sort and texture there by increasing yield. Opener can be mixed with all chemical fertilizers micro nutreints organic fertilizers bio fertilizers farm yard manure Verdicompost given in soil.

**Doses :**

2ml /ltr. per liter of water.

चेंजर

**CHANGER**

(Organic Green Seaweed)

Changer is a bio-technological innovation. It is an organic store house of naturally occurring nutrients derived from vegetable seaweeds ASCOPHYLLUM NODOSUM of Norway Origin with special hydrolysis. It is non-toxic & eco-friendly. It provides nutritional support in all stages of plant growth. It breaks complex molecules into simpler molecule so that molecule is easily utilized by the plants. It helps in faster development of root mass and cell growth resulting into better chlorophyll content. It improves soil microbe activity.

**Doses :**

Foliar Application : 1 to 1.5 ml per liter of water.

Drip Fertigation : 1 to 2 Ltr. per acre.

मिरॅकल

**MIRACLE**

(Specially For Flowering)

Miracle induces profuse flowering and reduces premature dropping of the flowers, buds & fruits. Miracle when applied at the critical growth stage of the crop significantly increases the yield. Miracle is quickly absorbed by the plants.

**Doses :**

Foliar Application : 1 to 1.25 ml per liter of water.

ब्रासी

**BRASSY**

Increases fruits setting,  
improves color and taste of  
Fruits and Vegetables

**Composition:**

NaturalN	:	5%
P202	:	5%
K20	:	10%
Lignins	:	5%
Brassinolide	:	0.1%

**Doses :**

Dissolve 2gm. of Brassy in 10-15 ltrs. of water and spray on crops  
Available Packing : 2gms. - 10gms.

## सेलेब्रिटी **CELEBRITY**

(ORGANIC FUNGICIDE)

Celebrity is a Organically derived product which is highly effective, eco-friendly to the crop & environment. Celebrity is an organic product to prevent and cure diseases like Downey Mildew, Leaf Spot, Damping off, Sheath Blight, Fruit Rot, Stem Rot, Anthracnose, Pythium, Blast and all Fungal, Bacterial Diseases. Celebrity can be used on Fruits, Vegetables, Cotton, Chillies, Rice, Groundnut, Maize, Banana, Mango, Horticultural, and Flower Crops. Celebrity is compatible with all fungicides and pesticides. Use Celebrity preventively on all crop to get better results.

### Doses :

1gm to 1.5gm per Ltr of water.

विज्ञान-२१

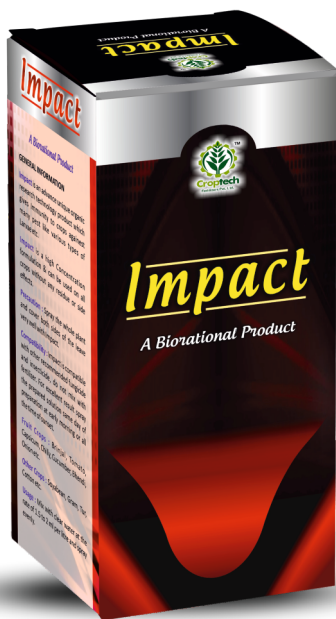

## VISION-21

(All Pest) VISION-21 is an advance unique organic research technology product which gives Immunity to crops against many pest like various types of Sucking Pest etc. VISION-21 is a high Concentration formulation & can be used on all crops without any residue or side effects. Compatibility : VISION-21 is compatible with other recommended fungicide and insecticide, do not mix with fertilizer. For excellent result spray the prepared solution same day of preparation at early morning or all the time of sunset. Fruit Crops : Brinjal, Tomato, Capsicum, Chilly, Cucumber, Bhendi, Onion etc. Other Crops: Cotton, Pomegranate, Grap etc.

### Doses :

Mix with clear water at the rate of 1.5 to 2 ml per litre and spray evenly.

**इम्पॅक्ट**

**IMPACT**

(Larvicide)

The formulation is primarily based on botanical extracts and modified natural oils. It is used to develop resistance in plant for heliothis, cutworms diamond back moth, borers and other cutting pests. This product can be applied up to harvest. It does not yield any knock down effect.

**Doses :**

Mix with clear water at the rate of 1.5 ml per litre and spray evenly.

स्टेटस

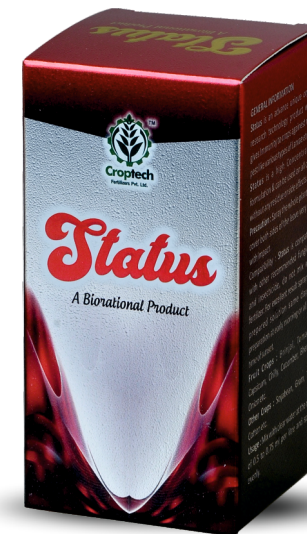

**STATUS**

(Larvicide)

The formulation is primarily based on botanical extracts and modified natural oils. It is used to develop resistance in plant for heliothis, cutworms diamond back moth, borers and other cutting pests. This product can be applied up to harvest. It does not yield any knock down effect.

**Doses :**

Mix with clear water at the rate of 0.5 to 0.75 ml per litre and spray evenly.

## क्रॉप मायसिन CROP MYCINE

CROP MYCINE Useful for Prevention & Curative Control of Bacterial Disease Like Leaf Blight, Black-arm, Canker, Angular Leaf Spot, Seedling Blight etc. In cotton, Citrus, Paddy, Chillies, Beetlevine, Vegetables, Flowers, Ginger, Tomato, Onion and Fruits.

### Doses :

20 gm to be dissolved in 60 liters of water and sprayed.

**क्रॉप-वेट**

**CROP-WET**

(Technical Spreader)

Crop-Wet is a high quality & unique nontoxic spray adjuvant. Attach Plus increases the effectiveness of insecticides / fungicides & herbicides. Attach Plus reduces spraying cost. Attach Plus can be used for all agricultural & Horticultural crops

**Doses :**

Foliar Application : 0.25 ml per liter of water.

## जि-आर कावेरी GR-KAVERI

The Gr-Kaveri increases nutrients assimilation and provides multiple benefits to enhance the crop yield. Its increases root mass, fruit yield and Bio-mass of the plant. Its also assists in transforming macro and micro nutrients from the soil to the plant. It reduces fertilizer doses by 20-25% & improves soil porosity, enhance aeration and water retention capacity of the soil. It restores & ensures continuity of bio-cycle thus increases soil fertility by increasing micro flora population, accreting organic matter decomposing and increasing Humus/carbon content.

### Doses :

20 kg per Acre @ 30 days interval 2 times in horticulture crops.

## Chelated Mix Micronutrients Fertilizer - Grade#1

संपूर्ण नुट्रीशन किट

### SAMPURNA NUTRITION KIT

Sixteen different types of nutrients are required for the growth of crops. The main nutrients and secondary nutrients are supplied to the soil from chemical fertilizers. In order to compensate the deficiency of micronutrients in the soil, micronutrient components have to be supplied, even if in small quantities. The supply of micronutrients improves the quality of the crop and helps in making other essential nutrients available to the crops and overall growth of the crop.

**Composition** : Mg : 25kg., Fe: 10kg.,  
Micronutrient Mixtur grade-I: 10kg.,  
Zn:5kg., Mn:2kg.

#### Doses :

52 kg. Kit per acre

## Chelated Mix Micronutrients Fertilizer - Grade#1

न्यूट्री बॉस

**NUTRI-BOSS**

- Nutri-Boss is a dry process recycled sulfated molecule grade 1 micronutrients mixer.
- Nutri-Boss is a special grade for Drip.
- Nutri-Boss is a Maharashtra government standard grade 1 mixer, Nutri-Boss helps to compensate for micronutrients deficiency in crops and helps to increase yield.

### Composition:

Fe-2.0, Mn.1.0, Zn-5.0, Cu-0.5, B-1.0

---

### Doses :

2 kg. per acre
